

ROTARY TABLE

RA-3200

ROTARY TABLE

RELIABLE • EFFICIENT • VERSATILE

The RA-3200 Rotary Table is designed to efficiently accumulate and align containers on your production line. Built for reliability and smooth operation, it helps improve workflow and ensures consistent movement for increased line efficiency.

RELIABLE
Built with quality components for long-term performance.

EFFICIENT
Ensures smooth and consistent movement of containers.

VERSATILE
Compatible with a wide range of containers and equipment.

SMOOTH OPERATION
Provides consistent and dependable container movement.

KEY FEATURES

CONTINUOUS FLOW
Designed to accumulate containers for a steady production flow.

ADJUSTABLE GUIDES
Side rails and guides are adjustable for various container sizes.

STAINLESS STEEL CONSTRUCTION
Durable stainless steel construction for reliability and easy maintenance.

COMPACT DESIGN
Compact design for easy integration into existing production lines.

TECHNICAL SPECIFICATIONS

Model	RA-3200
Table Diameter	42" (inch) Diameter
Speed	Variable speed
Drive	DC motor
Frame Construction	Stainless steel
Power Requirements	110V, 1 Phase, 60Hz
Controls	Speed control dial
Guide Rail	Adjustable

i

CONFIGURATION NOTE
Standard configuration includes rotary table with adjustable guide rail and variable speed drive.
