

AUTOMATIC CAPPING

TRUCAP-X VERT AUTOMATIC CAPPER

ACCURATE • VERSATILE • RELIABLE

The TruCap-X Vert is a fully automatic in-line capping machine designed for a wide variety of industries and products. Built with quality components and user-friendly controls, it delivers accurate, consistent capping performance to keep your production running smoothly.

PRECISION

Engineered for accurate and consistent capping results.

EFFICIENCY

Fully automatic operation helps maximize line productivity.

RELIABILITY

Built with quality components for long-term dependability.

FLEXIBILITY

Designed to handle a wide range of container and closure sizes.

KEY FEATURES

FULLY AUTOMATIC

In-line automatic capping machine for seamless integration into your production line.

WIDE RANGE COMPATIBILITY

Designed to cap a wide variety of container and closure sizes.

ADJUSTABLE ELEVATOR HEAD

Elevator head height adjusts up and down for easy changeover.

USER-FRIENDLY CONTROLS

Simple and intuitive controls for quick setup and operation.

TECHNICAL SPECIFICATIONS

Machine Type	In-line automatic capping machine
Operation	Fully automatic
Container Range	Wide range of container sizes
Closure Range	Wide variety of closure sizes
Elevator Head	Height adjusts up and down
Controls	User-friendly
Construction	Stainless steel and quality components
Application	Designed for a wide range of industries and products

CONFIGURATION NOTE

Standard configuration includes in-line capping machine with adjustable elevator head and user-friendly controls.
