

AUTOMATIC CAPPING

TRUCAP-X Wfall VP AUTOMATIC CAPPER

ACCURATE • VERSATILE • RELIABLE

The TruCap-X Wfall VP is a quill style in-line capping machine designed for a wide variety of containers and closures. This machine is built with rugged construction and user-friendly controls to provide years of trouble-free performance.

PRECISION

Delivers smooth, consistent and accurate capping.

EFFICIENCY

Quill style design handles a wide range of containers and closures at high speeds.

RELIABILITY

Rugged construction and quality components provide years of trouble-free performance.

FLEXIBILITY

Designed to accommodate a wide variety of container and closure sizes.

KEY FEATURES

QUILL STYLE DESIGN

Quill style in-line capping machine designed for high speed operation.

WIDE RANGE CAPABILITY

Handles a wide range of containers and closures.

HIGH SPEED PERFORMANCE

Designed to handle a wide range of containers and closures at high speeds.

USER-FRIENDLY CONTROLS

User-friendly controls for simple operation and adjustments.

TECHNICAL SPECIFICATIONS

Machine Type	Quill style in-line capping machine
Operation	Designed to handle a wide range of containers and closures at high speeds
Container Range	Wide range of containers
Closure Range	Wide range of closures
Controls	User-friendly controls
Construction	Rugged construction
Application	Designed for a wide range of industries

CONFIGURATION NOTE

Standard configuration includes quill style capping machine with user-friendly controls.
